Over the course of 30+ years Dr. William P. Kalosieh has counseled numerous individuals, families and couples in the throes of a crisis whether part of normal human development or unexpected and causing the normal balance of routine daily life to falter. Counseling sessions typically favor the emotional over the rational and often preclude the therapist from educating the client about the issue, problem, concern that brought him/her to therapy. In this compendium of articles Dr. Kalosieh writes about not only the issues and concerns he frequently encountered in his practice but also about some notions that have fascinated him for many years. The articles range from personal, emotional development to interpersonal dynamics both normal and abnormal or healthy and unhealthy. The sequence is merely conventional and the reader is at liberty to select a topic or concern he/she wishes to explore. The author does not present a system to interventions based upon his own theory of personality and marriage, rather he utilizes the techniques, strategies and theories of highly regarded experts in various fields of psychotherapy. The articles are intended to be above all helpful to individuals, couples and families as they face the challenge of maturity, communication and raising a family. Promoting a peaceful, harmonious village requires peace of mind and heart in the individuals.

Given Guatemala's record of human rights abuses, its legal system has often been portrayed as illegitimate and anemic. I Ask for Justice challenges that perception by demonstrating that even though the legal system was not always just, rural Guatemalans considered it a legitimate arbiter of their grievances and an important tool for advancing their agendas. As both a mirror and an instrument of the state, the judicial system simultaneously illuminates the limits of state rule and the state's ability to co-opt Guatemalans by hearing their voices in court. Against the backdrop of two of Latin America's most oppressive regimes—the dictatorships of Manuel Estrada Cabrera (1898 – 1920) and General Jorge Ubico (1931 – 1944)—David Carey Jr. explores the ways in which indigenous people, women, and the poor used Guatemala's legal system to manipulate the boundaries between legality and criminality. Using court records that are surprisingly rich in Maya women's voices, he analyzes how bootleggers, cross-dressers, and other litigants crafted their narratives to defend their human rights. Revealing how nuances of power, gender, ethnicity, class, and morality were constructed and contested, this history of crime and criminality demonstrates how Maya men and women attempted to improve their socioeconomic positions and to press for their rights with strategies that ranged from the pursuit of illicit activities to the deployment of the legal system.

Answers questions about health care, nutrition, common illnesses, safety, and behavior problems

A "sink or swim" philosophy frequently prevails in mental health settings today. As a life raft for beginners and their supervisors, Where to Start and What to Ask provides all the necessary tools for garnering information from clients. Lukas also offers a framework for thinking about that information and formulating a thorough assessment. This indispensable book helps therapeutic neophytes organize their approach to the initial phase of treatment and navigate even rough clinical waters with competence and assurance.

*Come into my heart and journey with me as I share the story of Emma. It is an amazing tale of faith, hope, and love interwoven into the lives of two families and one very special child. This story is a touching illustration of the miraculous work of God, the great choreographer. I am GG, which stands for Grandma Grace. It's a name I dearly treasure because it was given to me by a family whom I have grown to love as my own. Besides being mother to four beautiful daughters, I am GG to Emma and the parents God chose for her. If anyone had told me that my dream of being a grandmother would have followed this path, I'm not sure I would have believed it. It's not a path I would have chosen on my own, to be sure, for it was not always an easy path. Yet it was a journey that was unimaginably rich, for God was present every step of the way. There were many blessings on this path, and the gift at the end of the journey was priceless. This is my story ...*

*In the 1960s, increasing numbers of African American students entered predominantly White colleges and universities in the northern and western United States. Too Much to Ask focuses on the women of this pioneering generation, examining their educational strategies and experiences and exploring how social class, family upbringing, and expectations--their own and others'--prepared them to achieve in an often hostile setting. Drawing on extensive questionnaires and in-depth interviews with Black women graduates, sociologist Elizabeth Higginbotham sketches the patterns that connected and divided the women who integrated American higher education before the era of affirmative action. Although they shared educational goals, for example, family resources to help achieve those goals varied widely according to their social class. Across class lines, however, both the middle- and working-class women Higginbotham studied noted the importance of personal initiative and perseverance in helping them to combat the institutionalized racism of elite institutions and to succeed. Highlighting the actions Black women took to secure their own futures as well as the challenges they faced in achieving their goals, Too Much to Ask provides a new perspective for understanding the complexity of racial interactions in the post-civil rights era.*

Being a parent is more challenging today than it's ever been. In All About Children, this thoroughly reliable and effective clinical psychologist Dr Tony Humphreys outlines effective ways of parenting and positive responses to difficult behavior in children. Sometimes the task of parenting seems overwhelming. At others it provides great fulfilment and joy. It is unpredictable; the challenges are forever changing and much of what we might have learned from our own parents

irrelevant now. Parenting is not learned by instinct; it requires many complex skills. Parents have responsibility for the emotional, social, sexual, behavioural, educational, creative and spiritual development of their children, and at the same time must love them unconditionally. Tony Humphreys recognises the many and varied challenges faced by parents today. In *Children*, he provides an invaluable resource for parents by taking the questions they most frequently ask and providing clear and comprehensive answers. He begins by pointing out that in order to develop parenting skills, each parent must first work on themselves and be prepared to continually update their knowledge as the needs of their children alter as they grow. He then looks at the practical aspects of everyday parenting skills and then looks at different aspects of challenging behaviour in children and parents. The book concludes with a chapter on learning and education, two core concerns of every parent. In a question-and-answer format, *All About Children* provides today's parents with not only the vital information they need but also points out the skills they need to carry out their demanding task effectively. *All About Children: Table of Contents* includes: Where does parenting begin? What roles do parents need to play? What are the skills needed for everyday parenting? How do parents best respond to children's challenging behaviours? How can parents resolve their own challenging behaviours? How can parents prepare children for living their lives fully?

How can we make it easier for schools and families to work together on behalf of all students? It all begins by tapping into the different strengths educators and parents and caregivers can contribute to building a strong partnership. *Partnering with Parents: Ask the Right Questions*, by Luz Santana, Dan Rothstein, and Agnes Bain of the Right Question Institute, presents a simple strategy for how educators can build effective partnerships with parents—especially those who typically have not been involved in their children's schooling. It distills complex, important ideas on effective civic participation into an easy-to-use process that teaches parents two fundamental skills they can use to support the education of their children, monitor their progress, and advocate for them: asking better questions and participating effectively in key decisions. Based on more than ten years of work and research in a wide range of low- and moderate-income communities, this book empowers overburdened and under-resourced educators and parents to work together and achieve their common goal of successful students. This includes case studies spanning K-12 classrooms, and it explores ways to assist struggling students, collaborate on strategies to communicate with families of English language learners. The accessible and easy-to-use format, field-tested advice, and examples from schools that put the advice into practice make this a must-have for everyone from the classroom teacher to the parent. Sahira's story is a tale of two friends, Sahira and Christie, who live next door to each other and became as close as sisters. Only children. Christie is part of a single-parent family, with her dad as her only parent. Sahira is the child of immigrants. The cultural differences between the two seem unimportant at first, but as the girls reach their late teens, there are stark reminders of the differences between the two families. Sahira's father expects—and demands—instant obedience. Christie's father is a laid-back North American dad. Christie is shocked when Sahira announces that her father has arranged a marriage for her with a man she has never met, a situation Christie denounces as impossible and plots to help Sahira escape her father's domination. Can her plan succeed? The reader will have to wait until the last page to find out.

*The original Bill of Rights, sponsored largely by James Madison, is now about 210 years old. Reinforced by the Fourteenth Amendment, which eventually applied many of its provisions to the states, it has served us well. It is time to re-evaluate our fundamental constitutional rights and to seriously consider their major renovation. This is my central proposal. Are we ready to trust ourselves as individuals with the personal responsibilities that go with rights? When government defines personal moral values, we tend to take less account for not only our own actions but also our own underlying values, for those spiritual yearnings that make us, all unique people, who we are. We tend to lose interest in speaking for ourselves and tend to leave moral judgments to "experts" who get paid to pass judgment on all of us. I discuss a philosophy, often called libertarianism, of extremely restricted government. I present it from the personal perspective of a gay man who grew up in a period of enormous change and migration toward cultural individualism. My argument is intended for everyone, but I provide my own detailed perspectives on many issues. The parallel between draft deferments during the Vietnam era and the gays-in-the-military battle today How close the gay community, as we know it, came to total catastrophe during the early days of AIDS crisis What the "family values" debate is really all about Volunteerism and social obligations, and how both military service and parenting fit into these What "discrimination" is really all about How the "Don't Tell" mentality interferes with political and social debate in many areas Why equal rights for gays is important for everybody A science of personal growth and why libertarianism is good for personal growth*

*Homeschooling the Child with Autism* This practical, highly accessible guide answers parents' and professionals' questions about teaching children with autism spectrum disorders at home. The book helps parents decide whether to homeschool and guides them through the process of beginning and maintaining an effective homeschool program. All the essential questions are addressed, such as: How do you know if homeschooling is right for you and your child? Which homeschool program is best for the child's learning style and needs? How should a family get started? What is the best way to address social, behavioral, and organizational skills when teaching a child with ASD? When should you transition back to a traditional public school setting? The book also contains tips and suggestions from real-life parents who have successfully homeschooled their children with ASD and includes lists of helpful resources for homeschoolers. Where did I come from? What happens when you die? What's divorce? From the moment children can formulate questions they begin to bombard their parents with "Why?" "What?" "Where" and "How?" Naturally curious they often catch us off guard leaving us unsure of how to answer their questions with an appropriate response. Fully revised and updated for the digital age, this new edition of Dr Miriam Stoppard's essential parenting manual provides age-appropriate answers to a huge range of challenging questions. Drawing from extensive research in child development and specifically on what children can handle at each age, Stoppard offers parents a foundation on which they can build their own answers as their child's understanding expands.

When faced with a misbehaving child, do you find yourself resorting to lecturing, reminding, or even yelling? Do you sometimes feel helpless and panicky after you have tried everything you know to do and your child still seems "out of control" or withdrawn? Do you feel frustrated when nothing you are doing is moving your children to be responsible and achieve their unique potential? Ask More, Tell Less provides a new model of parenting that can help transform the growing-up years. Life will become fulfilling and enjoyable rather than an ongoing, painful collision of wills. Behavior troubles diminish or vanish when children discover that they have the power to make their lives run more smoothly. These methods are not a "cater to the children" approach. Instead, they take the pressure off parents and put the whole family on a positively different road, traveling together in a land of mutual dignity and respect, maturity, and lasting change. Greg Warburton brings time-tested, practical methods out from

behind the counselor's door to enable you to give your children the greatest gift of all: self-reliance. Through artful questioning, you can give them a clear and compelling road map for getting on with growing up in this rapidly changing world.

It's no secret that parenting is tricky business. With advice flooding in from all sides, strong-willed children pushing against boundaries, and our own human flaws, it's easy to get bogged down in every how-to that we're not doing well. But maybe that isn't the right approach. Maybe the first step is not to ask "how" but to ask "why." Like most parents, when Shelly Wildman had children, she consulted books, sermons, and lectures on how to raise the best children possible. Yet every resource focused on how to get external results: children who behave the way others expected them to. For Shelly and her husband, the turning point happened when they started asking why instead--shifting their focus to internal change. That's when their purpose as parents became clear: parents are called to do their best to show kids how to know and love Jesus, to love others, and to make a difference in the world. There are no rules here, no inflexible series of steps that lead to perfect parenting. Instead, Shelly encourages parents to think about their unique family and why each child's needs for spiritual growth might look different. She walks you through intentional questioning, focusing on building a firm foundation for lasting discipleship. And in the end, you'll discover that God wants the same outcome you do: a child who knows Christ intimately, loves him deeply, and has a heart to serve him fully.
